

Technology Experiential Learning Program (TELP)

 **5 weeks**

 **1 week online, 4 weeks
in-person in Canada**

 **Certificate**

This is a comprehensive technology experiential learning program designed for students, recent graduates, and early and mid-career professionals interested in pursuing a career in the technology industry. The program provides practical, hands-on learning experiences, mentorship and career coaching, and the opportunity to develop in-demand skills that employers worldwide value.

Career Opportunities

The TELP program can give you experience in a variety of technical areas, such as:

Digital Technologies | Medical Devices |
Water Technologies | Security
Technologies | Digital Media |
Cybersecurity | Aerospace | Biotechnology |
Construction | Clean and Environmental
Technologies | Forestry | Manufacturing |
Food Innovation

Delivered in partnership with over 60 leading applied innovation hubs across Canada, participants work directly with employers to solve real-world innovation challenges. Upon completion of the program, the program participants and employers explore opportunities to provide pathway into full-time roles for the participants.
